ABOUT US

VAROL LIGHTING

Satisfying the requirements of the International IEC EN 60598-1 Lighting Fixtures Standard, we provide added value to our business partners with our products, work carefully in terms of efficiency factor, economic efficiency and sustainability, and also offer innovative solutions in aesthetic and functionality.

We offer integrated lighting solutions that enable the interaction between light and architecture to achieve the optimum solution in all its different complexity. We are trying to present quality, efficiency, functionality, aesthetics and cost in optimum components with modern approaches in our designs depending on special demands and our product development policy.

We observe the effects of light on the health of living creatures, apply lighting techniques that will increase the comfort of life, and strive for a better life by making life easier.

We take people, the environment and the light at our center, and we consider valuing people as our main goal in all our activities. We want our colleagues and everyone we interact with to feel that they are a part of us and that they are valued.

We are well aware of the problems and needs of the lighting industry. With our gained experience, we produce products and services that can best meet the needs. We care about cooperation with our business partners in order to achieve better.

We strive to create added value for our future with a sense of responsibility.
